Unencumbered & Essential

Wireless Communications Portfolio

Patent Acquisition Opportunity

The information in this package is provided for the sole purpose of supporting the independent evaluation of these patents by prospective buyers, and does not constitute legal opinion or representation. Any discussion of the potential use of the patented inventions by particular products is for illustration purposes only and is not intended to be, nor should they be construed as, notice of, or any form of accusation of, infringement of any of the indicated patents by any products. In addition, the materials provided by GTT Group are copyrighted material and are intended for use by the receiving party solely for their use in determining whether to purchase the patents offered for sale by GTT Group and their participation in the sales process run by GTT Group.

Wireless Communications Patent Portfolio

US Patents

5 issued patents

Technology Areas

The portfolio generally relates to filtering, antennas and transceiver technology in wireless communications.

Applicable Standards

HSPA & WiMax

Bidding Deadline

September 21, 2011

Encumbrances

Information will be made available to qualified purchasers under NDA.

Evidence of Use & Value

GTT Group will provide normalized claim charts and value guidance under NDA.

Seller Information

- The Seller develops and markets wireless communications solutions that deliver data, voice and video for critical networked communications and other applications.

Acquisition Opportunity Summary

- The Wireless Communication Portfolio is comprised of 5 issued US patents related to Physical Transceivers, Physical Receivers / Antenna Details, and Filtering / Algorithms.
 - Physical Transceivers relate to bidirectional modems or repeaters, dual-interface transceivers, and signal couplers for coupling different signals at a receiver.
 - Physical Receivers / Antenna Details relate to the physical details of antennae. For example, the particular substrates or arrangements of antenna elements. This category is most closely related to hardware and engineering concepts.
 - Filtering / Algorithms describes methods and apparatus for performing operations related to data modulation, noise filtering, feedback error filtering, modulation, and vector combining. Generally, this category is likely to have the most relation to relevant specifications and standards.

Transaction Structure

- The Seller prefers an all-cash transaction. Seller has preferred purchase agreement, which can be provided prior to making offer.

Bidding Deadline

- All offers for the portfolio should be made in writing by September 21, 2011, or earlier.

Submitting an Offer

- Offers should be submitted in writing from an authorized party stating the price offered and any material conditions to closing.

Pricing

- No price floor has been set. Seller reserves the right to accept any offer and refuse any and all offers in its sole and arbitrary discretion. GTT Group is able to provide value guidance to qualified interested parties.

Non-Notice

- Seller has agreed that the information provided to prospective purchasers throughout this sales campaign will not be used in any legal or administrative proceeding directed to enforcement of any patent associated with the Distributed Computing Portfolio.

Evidence of Use & Value Guidance

- GTT Group is prepared to discuss evidence of use and present claim charts to interested parties under Seller approved non-disclosure agreement.
- GTT Group is prepared to discuss value and provide guidance to interested parties under Seller approved non-disclosure agreement.
