GTT Group Announces the Availability of Interdigital Patent Portfolio Study

Portland, Oregon (October 2011) -- GTT Group is pleased to announce that the Interdigital (IDCC) Patent Portfolio Study will be available October 20th. The study groups IDCC's patent assets into key technology areas that are driving value. The study includes relative monetary value contribution for each technology area as well as providing insight into the portfolio's overall value, taking into account current market fluctuations. The study also identifies the relevant value drivers within each technology category and assets with the broadest potential applicability.

"There has been much discussion of the Interdigital Patent Portfolio and the value associated with it, especially on the heels of the Nortel patent portfolio and Motorola Mobility transactions. GTT Group's objective has been to create transparency and allow subscribers to make informed business decisions," commented Michael Lubitz, GTT Group's CEO and Chairman.

For additional information related to the study including subscription information, please contact Dan Buri at dburi@gttgrp.com. All inquiries will be kept strictly confidential.
