

FOR IMMEDIATE RELEASE – January 31, 2012

GTT Group Announces the Availability of the Cloud Computing Patent Landscape Study

Portland, Oregon (January 2012) -- Global Technology Transfer Group (GTT Group) is pleased to announce the availability of the Cloud Computing Patent Landscape Study.

The Cloud Computing Patent Landscape Study encompasses over 5,000 patents related to the delivery of shared resources or client computing services. The Study analyzes the technology value drivers within the Cloud Computing patent asset landscape. The Study provides a synopsis of filing trends over the last two decades, including a look into recent filing growth. The Study offers subscribers key insight into patent ownership and value in an expanding technology sector, including a look at the three dominant patent holders and related ownership risk.

The Cloud Computing Patent Landscape Study contains ownership breakdowns and analysis of dominant ownership positions in key technical segments that are integral to the Cloud Computing space. Ownership percentages and relative monetary values for major market participants are highlighted. The study also offers an overview of major patent litigation occurring in the Cloud Computing space, as well as recent merger & acquisition data. Key insight is offered into further patent acquisition opportunities in the space. In addition, licensing and litigation trends and the potential impact on the Cloud Computing sector are examined.

“The Study is an essential guide for the patent business and risk assessment manager. GTT Group has attempted to concisely assess relative ownership and related risk. The study provides a mandatory overview for patent business and strategic M&A professionals,” commented Michael Lubitz, GTT Group’s CEO and Chairman. “Cloud Computing is a diverse yet expanding technology space and the patents are becoming increasingly important as the market continues to grow and consolidate. As Cloud Computing technologies become formalized into mainstream products and services, licensing and litigation activities will only increase. The Cloud Computing Patent Landscape Study offers subscribers key insight into ownership and patent risk minimization as well as acquisition opportunities.”

For additional information related to the study, including subscription information, please contact Dan Buri at dburi@gttgrp.com. All inquiries will be kept strictly confidential.
