

FOR IMMEDIATE RELEASE – September, 2016

GTT Group to Sell Cloud Technology Patent Portfolio

Portland, Oregon (September 2016) -- Global Technology Transfer Group, Inc. (GTT Group), the premier provider of patent brokerage and patent transaction advisory services to information and communication technology companies worldwide, announces the availability of a patent portfolio related to cloud networking and communications.

The portfolio contains 48 issued U.S. patents in seven patent families. The patents relate to cloud-based communications, software defined networking, and networking equipment.

The portfolio contains assets relating to cloud-based communications that provide features and functionality for seamless communication between devices. Key features covered by the patents include in-bound call notifications across unified communication devices and call routing in a virtual PBX system.

The portfolio also contains patent families that pertain to use of virtualization in an intelligent network. Key claims are applicable to cloud-based platforms for providing cloud-based communications services. The claims describe transmitting commands from a network controller to virtual machines for implementation.

Additional claimed technology relates to networking equipment and packet routing. One exemplary patent contains inventions that relate to multicast switching. The claims aim to reduce multicast traffic in a network by allowing the network switch to listen in on conversations between hosts and routers so it can filter multicast streams.

“We are excited to be exclusively offering a strong portfolio related to cloud technology,” said GTT Group Director of Asset Services, Andrew Godsey. “Our client is a leader in the development of communication technology and this portfolio represents key inventions in the cloud networking and communication industry.”

GTT Group has prepared materials to illustrate the value of the portfolio. To receive more information about this opportunity, please contact Andrew Godsey. All inquiries will be kept confidential.

GTT Group will approach potential buyers and provide materials explaining the strategic advantages of acquiring the portfolio. In addition, GTT Group’s experts will be available to discuss the strengths of the patents and evidence of use in the market. The portfolio will be sold at a private auction in November 2016.

About Global Technology Transfer Group, Inc.

Global Technology Transfer Group, Inc. is a patent analysis and transaction advisory firm. The company's corporate headquarters are in Portland, Oregon.
