Data Synchronization Portfolio

Patent Acquisition Opportunity

The information in this package has been generated by GTT independently and is provided for the sole purpose of supporting the independent evaluation of these patents by prospective buyers, and does not constitute legal opinion or representation. Any discussion of the potential use of the patented inventions by particular products is for illustration purposes only and is not intended to be, nor should they be construed as, notice of, or any form of accusation of, infringement of any of the indicated patents by any products. In addition, the materials provided by GTT Group are copyrighted material and are intended for use by the receiving party solely for their use in determining whether to purchase the patents offered for sale by GTT Group and their participation in the sales process run by GTT Group.

Opportunity Summary

- GTT Group is exclusively representing the sale of 38 patent families containing 59 issued US patents, 8 US applications and over 100 foreign counterparts.
- The foreign counterparts include coverage in countries such as Japan, China, Germany, Great Britain, France, Taiwan and more.
- Key inventions in the portfolio generally relate to syncing data from one storage destination to another.
- Application of claimed inventions include Cloud Storage services and Media Player and Management Applications that import data from a source (e.g. mobile device, computer, etc.) that can ensure that only non-duplicate files are transferred during import.
- GTT Group has developed evidence of use (EOU) materials that are available for qualified purchasers. Please contact GTT Group for further information.

Data Synchronization Applications

- The ability to synchronize files across multiple devices is an essential feature for media player applications and file hosting services.
- Users now expect to have access to their content no matter where they are and what device they are using.
- The claimed inventions have been utilized by cloud storage providers and file hosting services that enable their users to synchronize their data with a host server.
- The claims are also applicable to traditional media players that allow users to synchronize their media content across devices.
- Media streaming services also compete with traditional media players by allowing users to upload their own content from files stored on a user's device acting as a user's media library.
